PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building and supporting web applications using Python, FastAPI, Flask, REST APIs, PostgreSQL, JavaScript and React.js. Hands-on experience with Git/GitHub, Docker, deployment, testing, debugging and application optimization. Interested in applying these foundations to DevOps, cloud engineering and Site Reliability Engineering, with a strong problem-solving and collaboration mindset.

EDUCATION

BTECH-CSE(AIML)
Malla Reddy Engineering College (2021 - 2025) | Hyderabad , India | 7.06CGPA

INTERMEDIATE
Viswa Sai Junior College(2020-2021) | Nellore , A.P | 7.17 CGPA

SECONDARY SCHOOL CERTIFICATE
Narayana(2018-2019) | Nellore , AP | 8.3 CGPA

PROFESSIONAL EXPERIENCE

Full Stack Developer — 11/2025 – 09/2026
IIT Tirupati Navavishkar I-Hub Foundation (IITTNiF) — IIT Tirupati Navavishkar I-Hub Foundation (IITTNiF)

- Developed full-stack applications using Python, FastAPI, Flask, React.js, HTML, CSS, and JavaScript.
- Built and integrated REST APIs with PostgreSQL using SQL queries.
- Used Git/GitHub for version control and supported testing, debugging, deployment, and optimization.
- Implemented responsive web interfaces and used Docker for application containerization and deployment.

SKILLS

programming languages — Python | JavaScript
Web Technologies — HTML5 | CSS | React.js
Backend Frameworks — Flask | Fast API | REST APIs
Database Query Language — SQL | PostgreSQL
Version Control — Git | GitHub
Containerization — Docker
AI Development Tools — **AI-Assisted Development:** Efficient use of Cursor, Antigravity, Vs code Chat GPT, and Claude AI for coding, debugging , Stitch.
soft skills — Communication Skills (Written & Verbal) | Problem-Solving | Teamwork & Collaboration

PROJECTS

GEO TRIP PLANNER

- **Problem:** Pilgrims struggle to plan multi-stop Tirupati trips, pick the right budget tier, and track temple visits without a simple digital flow.
- **Solution:** Geo Trip Planner — budget-based packages, place picker, interactive route map, personal temple QR check-in, and admin visit dashboard
- **Tech stack:** Python Flask, HTML/CSS/JS, Leaflet, PostgreSQL/SQLite, OpenStreetMap/OSRM, session-based auth.
- **Outcome:** Users plan trips faster, share routes on map, staff scan QR to log visits, and admins see visitor data in one place.

GEO INTEL META HUB

- **Problem:** Scattered geospatial data (vectors, rasters, LAS, 3D) is hard to store, publish, and view in one place.
- **Solution:** Flask app uploads files → PostGIS + GeoServer → web UI for search, maps, and 3D.
- **Tech stack:** Python/Flask, PostgreSQL/PostGIS, GeoServer, GDAL/PDAL/ogr2ogr, HTML/JS, Cesium
- **Outcome:** Central catalog with WMS/WFS (and rasters/3D) so users discover, preview, and serve layers from one platform.
